

Lanius ludovicianus migrans.—On September 19, 1901, at Yarmouth-port on Cape Cod I observed a single bird of this species, which from its wariness I was unable to secure. In the house where I boarded there was another specimen of the Migrant Shrike, taken near Lowell a number of autumns ago. These two records make the tenth and eleventh for the State.

Hylocichla fuscescens fuliginosa.—In this same house I discovered a specimen of the Newfoundland Thrush, taken also near Lowell, a number of autumns ago. This is the second record for the State.—REGINALD HEBER HOWE, JR., *Longwood, Mass.*

Necessary Generic Changes in Nomenclature.—*Helotarsus* Smith (S. African Quart. Journ., I, No. II, Jan.–Apr., 1830, 110), the commonly accepted generic name for the *Bateleur*, is slightly antedated by *Terathopius*, of Lesson (Traité, livr. i, Feb., 1830), whose name should be used.

Polyboroides Smith (S. Afr. Journ., I, Apr. 1830, 106), is a similar case, and should give way to *Gymnogenys* Lesson (Traité, livr. i, Feb. 1830, 64).

Cyphorhinus Cabanis (Archiv f. Naturgesch. X, i, 1844, 282), for a genus of Wrens, is preoccupied by *Cyphorhina* Lesson (Écho du monde savant, sér. 2, VII, June 15, 1843, 1068—type, *Podargus papuensis* (Q. & G.). *Leucolepia* Reichenbach should supersede *Cyphorhinus*.

Perissornis Oberholser (Proc. Acad. Nat. Sci. Phil., 1899, 216), a new name for *Dilophus* Vieillot, preoccupied, was long ago called *Creatophora* by Lesson (Compl. Œuvres Buffon, ed. Lévêque, XX, 1847, 308), whose name should be accepted for *Gracula carunculata* Gmelin.

Lessonia Swainson (Fauna Boreali-Americana, II, Feb. 1832, 490), should be used in place of *Centrites*, which was proposed by Cabanis (Archiv f. Naturgesch., 1847, I, 256), on the ground that *Lessonia* was preoccupied in botany.

Dendrophila Swainson (Classif. Birds, II, July, 1837, 318), is preoccupied by *Dendrophila* Hodgson (Madras Journ., V, No. 15, April, 1837, 432). *Calisitta* Reichenbach is available for the small group of Nuthatches to which Swainson applied the above name.

Docimastes Gould (Monogr. Trochil., IV, 1849, pl. 233), is antedated by *Ensifera* Lesson (Écho du monde savant, sér. 2, VIII, Oct. 19, 1843, 734). The Sword-billed Hummingbird should therefore be known as *Ensifera ensifera*.

Metallura Gould (P. Z. S., 1847, 94), was earlier named *Laticauda* by Lesson (Écho du monde savant, sér. 2, VIII, Oct. 22, 1843, 758—type, *Trochilus tyrianthinus* Loddiges), whose name should be used.—CHAS. W. RICHMOND, *Washington, D. C.*

Northern Visitants to Oregon.—Mr. B. J. Bretherton has recently sent me some birds from Lincoln County, Oregon, three of which are of particular interest.
