Acknowledgements

My research on the development of the curvilinear chairs would not have been possible without the contributions of numerous individuals. Thank you to Eva Ultz, Carolina Drabik and Pi Gardiner of the Merchant’s House Museum as well as independent scholar Mary Knapp who supported my research as I transitioned my summer 2009 internship project into a thesis topic. I am grateful to many librarians, archivists and curators who assisted me in my research, including: Lisa Conathan, Beinecke Rare Book and Manuscript Library, Yale University; Pat Boulware, Saint Louis Art Museum; Melanie Bower, Museum of the City of New York; Kathryn Chirametli, Toronto Reference Library; Jennifer Cohlman, Cooper Hewitt Library; Tim Decker, New Jersey Historical Society; Ann Morgan Dodge, John Hay Library, Brown University; Alison Kenney, City of Westminster Archives Centre; Susan Kriete, New-York Historical Society; Lisa Long, Redwood Library and Athenaeum; Kathleen O’Brien, New Jersey State Library; Jill Raymond, National Art Library, Victoria and Albert Museum; Mark Reaveley, British Library; Helena Richardson, Printed Book and Periodical Collection, Winterthur Library; Erin Schreiner, Avery Library, Columbia University; David Shuford, American Craft Council; Renée Watson and Fredy Rivera, Watson Library, Metropolitan Museum of Art; Loisann Dowd White, Getty

Many curators provided access to their collections or information on their collections. Thank you to Debra Schmidt Bach, New-York Historical Society; Brandy S. Culp, Historic Charleston Foundation; Anna D'Ambrosio, Munson Williams Proctor Arts Institute; Michael Hunter, Osborne House; Peter Kenny, The Metropolitan Museum of Art; Paul Miller, Newport Mansions for providing information and access. Dr Yekaterina Barbash, Assistant Curator, Arts of Ancient Egypt, Brooklyn Museum offered her insights on Egyptian motifs. Thank you to Murray Woldman of Woldman & Woldman for sending furniture construction images on a set of chairs included in an upcoming auction.

A number of individuals provided auxiliary support. Thank you to Paul Abruzzo, The New School, for teaching me the basics of RefWorks. Ben Waller in the Applications Development at the Museum of Fine Arts, Boston conducted special collections searches. Thank you to Hazel Clark, The New School, for overall support. Special thanks to my dear friend, Kate Taylor, who eagerly volunteered her time and energy and visited a number of prints and
drawings collections and rare book collections throughout London to ensure I was not excluding a crucial source. Thank you also to Ruthie Dibble for her continued interest and open ears and eyes through the long process of research, and to Georgene Huang for consistent encouragement.

I am particularly indebted to Peter Kenny for his ability to orient me to locate new avenues to explore that contributed greatly to my final research. Thank you to Sarah Lawrence who, throughout my graduate school experience, consistently offered excellent advice, important suggestions, and kept me grounded. Also thank you to both Claire Kenny and Kaitlin McKendrick, who fastidiously provided information on proposal and thesis deadlines, general course requirements, and other crucial details throughout graduate school. This thesis would not have been possible without the incredible efforts of my thesis advisor Barry Harwood. From our first meeting of discussing topic possibilities to our last on image captions, Barry has been exceedingly generous with him time, his knowledge, and his support. Always pointing me in the right direction, Barry has the incredible skill to convince a young scholar she is on the right path.

On a personal note, I express special thanks to my loving husband
Taylor Smith and to my great friend Ryan Rossitto who provided insights on the structure of my thesis and for graciously editing the manuscript. My parents, Hal and Kathy Christensen, and Sally Christensen, provided me with the foundation of confidence to embark and complete such a long project. Thank you to my in-laws Sally and C.D. Smith who are wonderfully supportive and interested in any project I pursue. And finally, to my fantastic sister Alice, who never falters in leading the way. The successful completion of her master’s thesis in 2009 and subsequent post in healthcare in Dar es Salaam has inspired everyone around her, including me, and this thesis is dedicated to her.
