Rept.

A LIST OF INSTITUTIONS OFFERING COURSE
WORK AND DEGREE PROGRAMS IN HERPETOLOGY

Prepared by

James A. Peters

SMITHSONIAN HERPETOLOGICAL INFORMATION SERVICES, 4

1965

4

Additional copies available from:

Division of Reptiles and Amphibians
U.S. National Museum
Washington, D.C. 20560

The list that follows has been prepared from forms filled out by the professors in charge of herpetological course work at the respective institutions, and thus represents the most current information available. The material is, for the most part, self-explanatory, but a few words of explanation are necessary. The word "yes" or "no" in the column marked "U.G. Res." indicates whether or not the institution has some type of undergraduate research participation program. This is often sponsored by the National Science Foundation, although each school is likely to be different. When offered, further information is available from the department concerned.

An "X" in the columns marked "M.A.-M.S." or "Ph.D." means that the institution offers that graduate degree for herpetological research. If these columns are not marked a student cannot take an advanced degree in herpetology in that institution. The columns marked "Grad" and "Undergrad" indicate the level at which each course is presented by the instructor. The address given under the column "institution" is sufficient to reach the proper place, if the state name is added. Revisions in the list will be welcome and an attempt will be made to keep it up-to-date.
