Washington, D.C. 20560

The names used in this index are those used by Cope, and a few of the species were erroneously identified or names were perhaps transposed, but no attempt has been made to bring the names up to date or to correct errors. In some instances Cope omitted the terminal lobes of the hemipenis, particularly when they were long, slender extensions of the much broader basal part. The plate on which the hemipenis appears is given immediately after the name, followed by the figure number in parentheses.

The index is trimmed to fit into the back of Cope's book.

Abastor erythrogrammus Daudin;		
Georgia, North America.....	23	(12)
Ablabes baliodirus Boie;Malaysia ...	19	(10)
Acanthocalyx ventrimaculatus Gray;		
western Asia	19	(5)
Acanthophallus colubrinus Gunther;		
Brazil	24	(11)
Acanthophis antarctica Shaw;		
Australia	29	(2)
Acrochordus granulatus Merrem:		
Siam	13	(13)
Adelphicus quadrivirgatus;Jan;	19	(9)
Adeniophis bivirgatus Schlegel;		
Siam	29	(5)
Alsophis angulifer Duméril and		
Bibron; Cuba	23	(4)
Amastridium veliferum Cope;		
Panama	24	(13)
Ancistrodon contortrix Linnaeus;		
New York	31	(4)
Ancistrodon piscivorus Linnaeus;		
Florida	31	(5)
Anomalodon madagascariensis		
Duméril and Bibron, Madagascar...	22	(11)
Anoplophallus maculatus Hallowell..	22	(2)
Aporophis anomalus Günther;		
Paraguay	24	(1)
