

TAXONOMIC INDEX TO ANDERSSON AND  
LÖNNBERG PAPERS ON PRESENT LOCATION  
OF LINNAEAN REPTILE AND AMPHIBIAN TYPES

Index prepared by Paulo E. Vanzolini

SMITHSONIAN HERPETOLOGICAL INFORMATION SERVICES

1969

Additional copies available from:

Division of Reptiles and Amphibians  
U.S. National Museum  
Washington, D.C. 20560

In a series of three papers published near the end of the nineteenth century, Lönnberg and Andersson annotated the present place of deposition of many of the types of species described by Carolus Linnaeus. It has always been difficult to use these papers, however, because the arrangement is by institution holding type material, and one must search through all three papers when seeking information on a single Linnaean species. This index will permit one to find all information on a single species in any of the three papers. Under each species listed the user will find first a Roman numeral referring to the paper, and then the pages within that paper on which the species is discussed. The three papers, with their reference numbers, are as follows:

- I. Lönnberg, Einar. Linnean Type-Specimens of Birds, Reptiles, Batrachians and Fishes in the Zoological Museum of the R. University in Upsala. Bihang till K. Svenska Vet.-Akad. Handlingar, band 22, afd. 4, no. 1, 1896, pp. 1-45.
- II. Andersson, Lars Gabriel. Catalogue of Linnean Type-Specimens of Snakes in the Royal Museum in Stockholm. Bihang till K. Svenska Vet.-Akad. Handlingar, band 24, afd. 4, no. 6, 1899, pp. 1-35.
- III. Andersson, Lars Gabriel. Catalogue of Linnean Type-Specimens of Linnaeus's Reptilia in the Royal Museum of Stockholm. Bihang till K. Svenska Vet.-Akad. Handlingar, band 26, afd. 4, no. 1, 1900, pp. 1-29.
