

## BIBLIOGRAPHY OF THE CHAMELEONTIDAE

1864 - 1964

A comprehensive bibliography of the Chameleontidae, including all valid species and subspecies, and all genera and subgenera. The literature is arranged chronologically by year of publication, and includes all relevant citations from the scientific literature, as well as from popular sources. The bibliography is intended to be a valuable reference for anyone interested in the biology and ecology of chameleons.

BIBLIOGRAPHY OF CHAMELEONIA  
INTRODUCTION

No comprehensive bibliography dealing with the Chameleontidae has ever been published. This listing is designed to serve as a single source of information on chameleons and contains most major papers for the one hundred year period indicated. Included are 520 citations, some of which are not entirely devoted to chameleons. In these, references to chameleons are indicated by the page numbers and plate numbers included within brackets. Papers which refer in their entirety to chameleons will contain no such indication.

ACKNOWLEDGEMENTS

This work was completed only through the kind and unfailing assistance of many persons. Because of their long hours in searching for references, I would like to thank the following staff members of Albert R. Mann Library (Cornell University): Mrs. Peggy Anderson, Mrs. Carol Baer, Mrs. Cathline Brown, Mrs. Martha Cohick, Mrs. John S. Griffith, Mrs. Helen Krebs, Mrs. Carolyn Myers, Miss M. Karin Schlenk, Mrs. B. Bliss Simon, Miss Shirley Taber, Mr. Fred Waldeck, and Mrs. Susan Woddard. Thanks also go to Sally Roche and Thomas Limner of the University of Rochester and Marcia A. Edwards of the Zoological Society of London.

Special consideration is due Mrs. Daniel M. Connelly for many hours of assistance and encouragement, Miss Virginia L. Stark for her help with many logistics problems, Mr. Peter A. Lewin for locating some obscure references, Mrs. Carl F. Busack for typing the original manuscript, and Mr. Richard Archbold for financial assistance without which this bibliography could never have been completed.

It is hoped that a table of contents and index to this listing will eventually be completed; a compilation of sources prior to 1864 is in progress.

In spite of the assistance, errors of omission are my own and, for these, I apologize. I would greatly appreciate assistance in locating these errors, and encourage those noting any to tell me about them.
