  In one of the inaugural titles from the Abbeville Kids imprint, Sophie's family is returning from vacation when her stuffed rabbit, Felix, disappears in a crowded airport. Readers will spot the lost toy on the luggage conveyor depicted in the first of Droop's cheery, busy spreads. As the distressed child goes home, Felix embarks on a whirlwind international tour, communicating with Sophie via five letters (which can be removed from envelopes attached to the pages). After each epistle describes the rabbit's sightseeing adventures in London, Paris, Rome, Cairo, Kenya and New York City, Langen fleshes out Felix's travelogue with additional information about the locales. Though its format obviously recalls the Jolly Postman books, Langen's wordy, occasionally awkward narrative lacks the ingenuity of those works. There are, however, several fetching extras: also tucked into the envelopes are a color snapshot of Felix in front of the Eiffel Tower and a "secret pyramid map" from Egypt; and when he finally arrives home on Christmas Eve, Felix carries a suitcase containing six travel decals. All ages.

But the hardworking Mitchell returns home to find his own mailbox empty. He decides to write a letter to himself, but when he goes out into the rainy night to mail it, the envelope blows away in the wind. Sending a Letter is a historical view of communication, from messengers and smoke signals to e-mail and faxes.

  About the book:

  School Library Journal
  Five-year-old Charlotte May Pierstorff begs to visit her grandmother, but her parents cannot afford to send her. In Idaho in 1914, the train is the only way to make the 75-mile trip over the mountains. The Pierstorffs come up with an unusual solution - mailing May. Sending her as a package is a third of the cost, and since her mother's cousin Leonard handles the railroad mail car, she does not have to travel alone. Children will delight in the fantasy aspects of the tale even after they discover that the story is true. Tunnell describes his research in an author's note. Rand's watercolor illustrations are masterful, as is the design of the book as a whole.

  Wales' account of the U.S. Postal Service's first, and probably only, canine mascot will strike a chord with animal lovers and inspire inquiries into history and geography. In 1887, on a cold, rainy night in Albany, New York, a postal worker takes pity on a shivering dog that has taken shelter in the depot. Although it's against the rules, the supervisor allows "Owney" to stay. One day, the dog jumps aboard a mail train and discovers he likes riding the rails. News of his adventures, which ultimately include a trip around the world, spreads as he travels, and people give him baggage tags from the places he visits. The overuse of exclamation points aside, the narrative is clear and straightforward, and the scratchy, earth-toned illustrations aptly convey both the scragginess of the stray and the nineteenth-century backdrop of the story. A satisfying tale, all the more pleasing for being true.

  About the book:

  School Library Journal
  A gentle story of friendship and hard work rewarded. Harvey Hare is truly dedicated. "No matter what the season, no matter what the weather, Harvey made sure the mail was delivered." Readers see him drooping in the heat at high noon on a summer day, soaked by autumn rains, and hopping through snowdrifts to make his deliveries. Finally, the animals decide to give him a present in thanks for his service. They agree upon an umbrella made of spring
grass, leaves, twigs, and flowers to protect him from the elements year-round. The softly colored illustrations reflect the shades of the changing seasons and adeptly portray the animals’ natural world. Children will find Harvey's ears particularly expressive, and will certainly agree that this hare is a postman extraordinaire. An appealing look at the value of doing one’s work well.   Provides a factual, exciting account of the American postal system in the 1860s, covering the origins and history of the Pony Express, its daring riders and their struggles, and the tale of the first East to West connection ever made.

  **About the book:**

  *School Library Journal*
  An interesting, if not exhaustive, look at the people who settled the West. With personal accounts and colorful portraits of some of the better known (and rowdier) individuals, Savage creates a cursory overview of the time. He gives the perspective of Native Americans as well as the prospectors and miners. Pony Express tells the story behind the expression, "The mail must go
through!" The riders, thieves, bandits and settlers are portrayed in vivid narrative and accounts. The author describes the origins of the Pony Express and its role in spreading the news of the first cannon shots at Fort Sumter, as well as its demise with the advent of the telegraph. Neither title presents new information, but each provides an interesting glance at the period. Black-and-white photos and reproductions appear throughout.
