

THE BERNADOU, ALLEN, AND JOUY KOREAN COLLECTIONS,
IN THE U. S. NATIONAL MUSEUM.

By WALTER HOUGH.

Korea is a peninsula, with an area of about 90,000 square miles, the east coast being formed by the prolongation of the coast of Asia opposite Japan, and the west coast separated from China by the Yellow Sea. On the north it is separated from Manchuria by the Yalu and Tumen rivers.

The country is mountainous and not very fertile. The climate is mild in the southern provinces, and severe on the Manchurian border. The fauna and flora are temperate and resemble those of Japan.

The coast has few good harbors, and is extremely dangerous for navigation on account of shallow water.

Politically, the kingdom is divided into eight provinces, each ruled over by a governor appointed by the King, from the ruling class, and responsible for the administration of affairs.*

There are also four independent provinces, to which governors are appointed. There are about four hundred subgovernors, or magistrates, of districts, also appointed from Seoul. It is estimated by Soh, a native Korean, that there are eighty thousand Government officers in Korea.

The population is variously estimated at from 11,000,000 to 28,000,000; the former figure is probably nearer the truth.

The people, in language and appearance, resemble the Japanese, and form what is known as the Koreo-Japanese stock, whose origin is Manchuria, which country has been aptly termed the "swarming place of nations."

Three types have been observed in Korea, the first characterized by short stature, yellow skin, and other resemblances to the Chinese. These live in the Yellow Sea provinces (Kwang-hai) nearest to China. The second type is also of short stature, swarthy skin, sparse beard, and resembles the Japanese. The third type, which is in great majority and may be taken as typically Korean, is of large stature, light skin showing ruddy color in the cheeks, and has a tendency to high cheek

bones, long face and heavy square jaw, black hair, sometimes wavy, and full beard. This type is found in the north province Ham-Kiung-do, and in the extreme south, in Kiung-s. u-do.*

"Among the gentry it is by no means uncommon to meet almost an English face, with round cheeks, small, aquiline nose, well-cut mouth and chin. Even a bright blue eye is not unknown, and the hair is by no means invariably pure black."†

Korean cities are surrounded with heavy battlemented walls of squared masonry studded with portholes, but without cannon, and having gateways of woodwork and tile. In every respect the fortifications resemble those of Chinese cities. (Pl. II.) There are many strongly fortified hill towns for refuge of the people during invasions. Villages are often fortified. Outside of the villages are the pastures and farms. (Pl. III.)

The houses are low, of one story, thatched with straw or with tiled roofs. They are of stone, and in point of stability excel those of the Japanese, who necessarily build with regard to earthquakes. Hewn masonry is common, but the walls are usually laid up of unhewn stone, tied with millet stalks before the spaces are filled with mud. The windows are few in number, square, covered with paper, and run in grooves; outside they are protected by heavy shutters. The roof is very heavy, with low pitch, but does not turn up at the eaves like the Chinese roof. The massive beams which support the roof lose one-third of their value by being pared away at the ends to fit into sockets cut in the top of wooden pillars. The brick and stone work between the pillars do not give much support to the roof.‡ A small city-house would be built in the shape of an L on two sides of a courtyard. A heavy wall separates each house from its neighbor. The entrance from the street is into a lobby, on either side of which is the kitchen and store room. The sleeping and living rooms open into a wide hall or onto a piazza which runs along the side next the yard. Larger houses are more complicated, but they preserve the hall and piazza feature. Often a portion of the house is made of wood and used only in summer.

Houses are heated by the kang, which consists of wedge-shaped flues under the stone floor, leading into a chimney. Farmers' huts are poor structures of stone, with the straw roof held down by a lacing of ropes and with the inevitable gourd vine climbing over it. (Pl. IV.)

There are three classes of people in Korea: (1) nobles; (2) middle class, consisting of doctors, painters, interpreters, scribes, and lower officials; (3) lower class, consisting of those who do manual labor. In the lowest rank of the last-mentioned class are butchers and tanners. The bulk of the population are farmers (Pl. V), who raise little more

than is required for home consumption and the payment of the high taxes. Caste is very strong in Korea. The occupations of the people are somewhat limited. The pedlars form a numerous and influential guild, and many children are engaged in this business. (Pl. VI.)

Mechanics, artisans, and tinkers, each with his peculiar outfit, are numerous in Korea, as in China. (Pl. VII.)

The yearly civil service examinations bring together great numbers of students (Pl. VIII) to the capital city. The examinations are conducted like those of China, and the successful competitors are sure of official promotion.

"Korean women have neither legal nor social standing."*

Except servants (Pl. IX), who go about bareheaded, the faces of the women in Korea are invisible. Women of the middle class when walking throw the coat, with sleeves, over the head, concealing the face. (See female costume, p. 450.)

In the palace there are numerous serving women who also embroider and sew; their costume and coiffure are shown in Pl. X. A Korean lady is shown in Pl. XI. It is highly probable that a closer acquaintance with Korean laws and customs will show that women, seemingly hampered by oriental ideas, are really of greater importance as a "power behind the throne" than has been suspected.

"Among other inheritances from China Confucianism has effectively permeated Korea. Buddhism seems not to have gained much of a foothold in Korea and is almost entirely under ban at present. It has often been observed that Koreans have little religious sentiment. Buddhism in Korea is, curiously enough to my mind, much less like the form of that religion obtaining in China, at least in the church ceremonies, if not its dogmas, than is even the Japanese. It presents many curious analogies with the Thibetan form of Buddhism, and in the style of church architecture, painting, etc., it has certainly been influenced by it. Several of the feasts are probably of Buddhist origin; others are Chinese or Japanese; but in most of them a certain indigenous element is perceptible which makes them worthy of our notice. The prominence given to exorcisms in Korea is characteristic of Lamaism, but in no wise of Chinese Buddhism, and may have been introduced with the Buddhist religion, although I am inclined to believe that it is coeval with the earliest existence of this people."†

Mr. Carles, in his excellent account of his travel in Korea, says: "Of superstitious observances there are many, mostly the outgrowth of Taoism. Shrines to the spirit of the mountains, with cairns to which stones are added by passers by, stand at the top of almost every ridge crossed by mountain paths; trees and bushes often have their branches laden with cotton streamers; stones or fossils of unusual shape are

placed in the shrines, and where hollows have been worn by the weather in sloping rocks by the roadside, every little cavity is frequently occupied by a stone placed there by suppliants for a fair journey; grotesquely carved figures called syou-sal-maki are erected at the entrance of villages to ward off the evil spirits. Taoist priests offer prayers to the mountain spirits for travelers. Evidences of some other religion exists in the which are half-length human figures (miriok) carved in stone. The largest are in Um-jin, near the Keum River in Cholla-do.

Lieut. G. C. Foulk, U. S. Navy, photographed the body and head of a figure 62 feet high, the cap differing from the Buddhist figures. The cap is a column 10 feet high supporting a slab of the same height; a similar column and slab is placed above the latter; bells hang from the corners of the slabs. There are two mirioks between Ko-yang and Pha-ju 25 feet high. One has a round hat and the other a square one, showing, according to Mr. Aston, that the former is to represent heaven, or the male element of Chinese philosophy; the latter, earth, or the female element.*

Perhaps the first ethnological collection ever brought to the West from Korea was a wisely chosen series of art products, to illustrate social and industrial life in Korea, sent to the U. S. National Museum by Ensign J. B. Bernadou, U. S. Navy, in 1884. With this nucleus, and the addition of the fine collection of Dr. H. N. Allen, secretary of the Korean legation at Seoul; a series deposited by Mr. P. L. Jouy, and the gifts of Mr. W. W. Rockhill, Mr. Gustavus Goward and others, the collection has grown in importance and interest.

The collection has been explained and studied by Ensign Bernadou, three Korean gentlemen in Washington (Pom K. Soh, Dr. Philip Jaisohn, and the late Penn Su), Dr. H. N. Allen, Mr. W. W. Rockhill, Mr. P. L. Jouy, Rev. W. E. Griffis, and others, to whom the compiler is grateful for information and suggestions.

Great interest centers in Korea from the fact that "we have there a human exemplification of the survival of the whole genera of industries and customs, while in surrounding regions these have been swept away or transformed,"† for the reason that Korea pursued a policy of complete isolation for many centuries and has preserved the customs of the Tang and Ming dynasties of China over four hundred years ago.

The peninsula of Korea, "like Cyprus, between Egypt and Greece, forms the link between the Chinese and the Japanese civilization—the old and the new."‡

The collections to be described are rendered more intelligible by keeping this connection in mind.

AGRICULTURE AND ALLIED INDUSTRIES.

Korea is strictly an agricultural country. The grains raised, samples of which were sent by Ensign Bernadou, are:

(1) Millet, *Ki-tjang*, grown everywhere in Korea and used both as food and to make a fermented drink. A larger variety of millet called *tjo* is common and plentiful in mountainous districts and is a staple for the poor.

(2) Sorghum, *son-sou* (*Holeus sorghum*). The seeds of a species of sorghum used by the poor.

(3) Barley, *pori*, is grown in all parts of the country.

(4) Rye.

(5) Rice, *moip-ssal*, is a staple. The variety called *tehap-ssal* is used in making cakes of dough of which the Koreans are fond; also, it is fermented to make *soul* or wine like the Japanese *saki*. The Koreans find it not so good for the table as common rice, since it does not readily become soft by boiling and does not expand so greatly.

Wheat and oats are raised.

Many vegetables are raised, chief among which are beans (*pat*) and peas (*kong*), the latter fed to horses, radishes, cucumbers, melons, turnips, yams, cabbage and sprout plants, etc.

The fruits are cherries, raspberries, blackberries, apples, peaches, plums, pears, apricots, quinces, mulberries, persimmons, oranges, lemons, pomegranates, grapes, and dates.

The principal nuts are chestnuts, walnuts, and the water nut called in China *ling* (*Trapa bicornis*).

Flowers are little cultivated, the Koreans not being proficient in ornamental and recreative horticulture.

There are laws compelling the planting and protection of trees, such as lacquer, mulberry, and pine trees. The country has been almost deforested.

The domestic animals are the horse, cattle, swine, poultry, dogs, and rabbits. Sheep and goats are not found in Korea.

The wild animals are the tiger, leopard, deer, bear, fox, wild boar, and a number of animals hunted for the fur, such as the seal and rat-like animals.*

MANUFACTURES AND OTHER ELABORATIVE INDUSTRIES.

POTTERY AND ITS MANUFACTURE—THE CERAMIC ART.

Korea, now known to the Koreans as Cho-sön, was formerly called by them Korai. The Kingdom of Korai ceased to exist just five hundred years ago; during its existence the potter's art flourished. The best ware was made at the city of Song-do, the ancient capital. After the foundation of the Kingdom of Cho-sön, the people of Seoul, the new capital, and the people of Song-do were for a long time bitter enemies during the civil war about the year 1400. From this cause the manufacture of pottery at Song-do declined until the Japanese invasion of 1597, when the work ended on the transplanting of the potters to Japan, and may be said to never have been resumed at that city.

“The pottery in common use in Korea at the present time consists of three kinds; the finest of white, pale buff, or bluish porcelain, sometimes decorated in blue and with a high glaze, is used for the table and consists of dishes, bowls, and bottles, also wash basins; the second quality is a pale-yellow ware, glazed, mostly made into bowls, undecorated and used by the poorer classes. * * * The third style of pottery is of the commonest kind, made of dark brown or reddish earth, is glazed inside and out, and has little or no decoration except a wavy line produced by wiping off the glaze, leaving the lighter under surface to show through.”*

Color decoration on Korean pottery was revived about ten years ago.†

Mainly the heavier forms survive; the source of these wares are the tombs, in which it was customary from time immemorial to place pottery for the use of the ancestral spirits. While the better class of ware was not generally buried, it is probable that the tombs of the kings, which date back over three thousand years (Soh), and are well known in Korea, contain materials for the history of art in the peninsula, and may prove that porcelain was invented by Korean potters.

EXPLANATION OF PLATE XI.

KOREAN LADY.

The costume is that of a married woman, and consists of a blue silk skirt and jacket. The cap is ornamented with a perforated jade-disk overlaid with a network of gold rings, and having a tassel of silk. The necklace is made of beads molded of sweet-smelling spices and gums, somewhat after the style of the rose-leaf beads worn by Turkish ladies. The gloves are a recent addition to the native Korean dress.

KOREAN LADY.

Finer specimens of Korean pottery are to be found in Japanese museums and in various collections. Japanese wares seem to owe their excellence to Korean potters.*

The glazed wares of the Song-do potteries, to be described, are seemingly protoporcelein, judging from the paste, which is evidently kaolinic. This variety of heavy celadon, or olive-colored ware, has been dug up from graves in Kiung-ju or Kiou-chiu, the capital city of the ancient Kingdom of Silla, which existed through one thousand years previous to 1000 A. D.

Korean *pe-chun* (sky color) ware was much esteemed by the Chinese, and there is a Chinese poem dating from the latter part of the Sung, or beginning of the Ming dynasty, setting forth the impossibility of imitating the *pe-chun* of Korean pottery. The poem begins, "*Kaoli pe-chun-ja*," "Korean sky-color porcelain;" *ja* being the Chinese *yao* or porcelain. (Soh.)

The mortuary pottery collection of Mr. P. L. Jouy was found in ancient graves, containing also objects of copper, bronze, and stone. The pottery is of an early type of unglazed and slightly glazed (*vernis*) earthenware, of archaic shape. Some of the objects were modeled by hand, patted into shape by an instrument, thrown on a wheel; or, a combination of these methods was used.†

The Korean potter's wheel consists of a circular table from 2 to 3 feet in diameter and 4 to 6 inches thick, made of heavy wood so as to aid in giving impetus to it when revolving. In general appearance it is not very unlike a modeler's table. This arrangement is sunken into a depression in the ground, and revolves easily by means of small wheels working on a track underneath, the table being pivoted in the center. The wheel is operated directly by the foot, without the aid of a treadle of any kind. The potter sits squatting in front of the wheel, his bench or seat on a level with it, the space being left between his seat and the wheel to facilitate his movements. With his left foot underneath him he extends his right foot and strikes the side of the wheel with the bare sole of the foot, causing it to revolve.‡

STONEWARE DISH (Koriu-ji-jub-si). Dark gray paste containing air-holes. Slip, dull greenish gray. Shaped like a shallow saucer with a low foot; it may be a rude cup stand. Slip corroded by long burial. Pl. XII, Fig. 1, upper line (commencing at the left).

This specimen, though probably four hundred years old, does not differ greatly in shape from the pottery now made. Dug up in Seoul.

WINE BOTTLE (Sul-biung). Heavy terra-cotta ware, covered with vitreous crackled enamel of a beautiful greenish-gray tint (celadon or olive color). Jug-shaped body; neck, a long tube with bulbous expansion midway. Short spout near the top of the body. Capacity, about 2 quarts. Pl. XII, Fig. 3, upper line (commencing at the left).

121612

Collected by Ensign J. B. Bernadou, U. S. Navy.

This bottle is an obsolete form of about the twelfth century. Fine old specimens like this are valued equally with real porcelain. Pottery of this class is also interesting as hinting at the origin of Satsuma ware.

WINE CUP AND STAND (Korü-sul-tjan and tjan-tai). Ancient piece of earthenware, rudely glazed. Stand, a shallow dish with rest in center in which sets the cup. Cup represents the lotus flower; lower portion of cup prolonged to fit in cup stand. Glaze corroded by age. Pl. XII, Fig. 1, lower line (commencing at the left).

This is mortuary pottery from a tomb near the ancient capital of Korea. From the shape and design it is believed by Koreans to be not less than six hundred years old. Conception and general outline good. Probably used in ancestor worship.

BOWL (Korü-gi). Paste, coarse, opaque; under the microscope it shows white, porcelainous strings, surrounding granular, yellowish masses; there are occasional brown patches. Glaze, thin yellowish green, patchy, vitreous, and crackled. Color of ware, olive. No evidences of use, as this bowl was dug from a tomb. Pl. XII, Fig. 2, lower line (commencing at the left).

Collected by Dr. H. N. Allen.

Made in the latter period of the Koriu dynasty, about six hundred years ago. This ware is regarded as of very fine quality; to its heaviness is due its preservation.

BOWL (Koriu-gi). Fine, white, hard-paste porcelain, elegant shape, light and delicate. Glaze, slightly greenish in tint, likely due to iron; the slight crackle is not uniform and is evidently not intentional. Wave or cloud ornamentation on the inside formed by scraping away the paste, the indentations filling with a thicker layer of glaze and showing deeper tint; corroded patches on outside of the bowl, due to long burial. Pl. XII, fig. 6, lower line (commencing at the left).

Height, $2\frac{5}{8}$ inches; diameter, $7\frac{3}{8}$ inches.

Söng-do, Korea.

121619

Collected by Ensign J. B. Bernadon, U. S. Navy.

This ware is of the Koriu period, from the potteries at Söng-do and is about five hundred years old. Pieces of this thin white porcelain are excessively scarce. The incised decoration under glaze is quite common in Chinese porcelain.

BOWL (Jil-tang-quan). Globular, dark red stoneware, glazed on the side subjected to the greatest heat. Used for boiling water, etc. PL. XIII, fig. 1, upper line (commencing at left).

Height, 5 inches; diameter, $5\frac{1}{2}$ inches; diameter of mouth, $3\frac{3}{4}$ inches.

Seoul, Korea, 1885.

121617

Collected by Ensign J. B. Bernadon, U. S. Navy.

Articles in great variety of this ware are to be had, from small bowls to large water jars resembling a barrel in size and shape. The latter are very thin, hard, and well made.

WINE BOTTLE (Sul-biung). Heavy glazed porcelain, ornamented with dragon design in blue. Low, wide body, diminishing rather abruptly into a tubular neck. Capacity, about 5 pints. PL. XIII, fig. 2, upper line (commencing at the left).

Height, $12\frac{1}{2}$ inches; diameter of globe, $8\frac{1}{4}$ inches; base, $5\frac{1}{4}$ inches.

Hoang-tjon, Korea, 1885.

121613

Collected by Ensign J. B. Bernadon, U. S. Navy.

Average specimen of modern Korean pottery. The Korean potters were unable to impart any color but blue to their white ware up to the revival of color decoration ten years ago. Used in buying and selling liquors, but not at the table.

TABLE WARE (Sa-ban-sang). Heavy porcelain, covered with a patchy glaze of greenish hue. Consists of saucers for fish, vegetables, etc., bowls for same, bowls for soup, rice, stew, and water. Some of the pieces are signed and all show rather rude workmanship. PL. XIII, figs. 1-6, lower line (commencing at the left).

Hoang-tjon, Korea, 1884.

121620-30

Collected by Ensign J. B. Bernadon, U. S. Navy.

This is the most inferior porcelain ware at present made in Korea. More pretentious vases of antique form, in white decorated with blue, or raised figures if molded, are found in every house. Ware is valued in proportion to its whiteness and the smoothness and brilliancy of the glaze; weight is a minor consideration.

TABLET (Cha-sak-biu-ru-dol). Of porcelain, with three divisions for mixing water colors.

Length, $6\frac{1}{8}$ inches; width, $4\frac{3}{8}$ inches.

Seoul, Korea.

Collected by P. L. Jony.

THE TEXTILE INDUSTRIES.

The fabrics of Korea are coarse in comparison with the fabrics of China and Japan, and the art of stamping cloth is said to be not known or rather has been lost, as has that of dyeing. The cloths made are of silk, nettle fiber from the *Bachmeria nivea*, called "grass cloth" or "ramie," hemp cloth, and fabrics from cotton. No woolen goods are made in Korea, there being no sheep raised. These fabrics are characteristic; the combinations of different fibers, such as the nettle and silk, make serviceable goods.

 Serviceable cloth for mourning dresses and for underwear. Presented by the King to Dr. Allen. The Koreans have an expeditious process for rotting the hemp used for making fabrics. "At the bottom of a large pit paved with stones, heated stones are placed. Bundles of hemp are pressed down on the stones and kept in position by stakes, the heads of which are above ground. On the hemp piles of grass are thrown, and the grass is closely covered with earth. The stakes are then withdrawn, and water poured through the holes. PAPER MANUFACTURE.

Paper is made in Korea from the bark of the *tak* tree or paper mulberry. The shoots of this tree are cut early in the fall; they are at once steamed, stripped, and the dark outer coating (used in making inferior paper) is scraped off and the strips are dried. When ready to make the paper, these strips are sprinkled with water and pounded with stones to separate the fiber. They are then boiled in weak lye and the mass afterwards steamed and washed clean in fresh water. The stems of a plant called *tak poul*, which is cultivated for the purpose, are macerated and boiled. The strained liquor is then mixed with the fiber already prepared and water added until it is of the proper consistency. From this paste paper is made by catching a film on the surface of a bamboo screen by a quick passage of this through the pulp. The successive sheets are piled up and separated at one end by straws.

MULBERRY PAPER (Gam-so-miung). Thick, unglazed; made from mulberry bark. Very tough, even with the grain tearing with great difficulty and running in wide shells.

Collected by Ensign J. B. Bernadon, U. S. Navy.

Korean paper is even tougher than the Japanese, and is one of the few Korean things that had made a reputation in the world before its home had become truly a part of the community of nations. (Percival Lowell: Chosŏn, p. 315.) It is used in several thicknesses to make armor and was exported to Japan for that purpose, also to China, where it is now used for garment linings. Used in civil service examinations. Taken in payment of tribute by the Government and generally used as currency by the people.

MOURNER'S COSTUMES.

The mourning customs of Korea are regulated to the minutest detail by the Chinese Book of Rites, the *Sa-ryei-pyellam*, a compilation of the burdensome rules that should govern, coming of age, marriage, death and burial, and the worship of the dead. The two latter are very full. The portion of the book laying down the mortuary customs is translated in Ross' Korea.

The two years' mourning period required on the death of parents is governed in such a way that it amounts to hermit-like seclusion of the producing members of society. The mourner hides his face, and sits literally in "sackcloth and ashes," and his labor is a loss to the state for two years.

MOURNING CAP (Tou-ken). Hemp cloth; wedge-shaped; made somewhat like a grocer's paper bag of a single piece of coarse stuff. Pl. XVIII, fig. 1, upper line (commencing at the left).

MOURNER'S HAT—Continued.

Collected by Ensign J. B. Bernadou, U. S. Navy.

This hat has a special use in mourning, being worn by a son before the burial of a deceased parent; worn also by adopted sons in mourning for their real parents. Otherwise, it is used by chair coolies and government slaves. The members of the peddler guild fasten small pieces of raw cotton at intervals around the base of the crown.

MOURNER'S HEAD RING (Tei-tou-ri). Two strands of rice straw covered with unhackled hemp twisted together to form a ring. Pl. XVIII, fig. 1, middle line (commencing at the left).

Diameter, 25 inches; height, $14\frac{1}{2}$ inches.

Seoul, Korea, 1885.

77066

Collected by Ensign J. B. Bernadou, U. S. Navy.

This hat is designed to hide the face, as it is considered a grievous breach of etiquette to look into the face of the mourner. Taking advantage of this custom before Korea was opened to foreigners, missionaries disguised themselves as mourners and lived and taught there for a long time without detection.

MOURNER'S HEAD BAND (P'omang). Woven of hemp threads; white tying cords. Same shape as ordinary head band; no button in front.

Length, 23 inches; width, 2 inches.

Seoul, Korea, 1885.

The ball before the dragon is believed to possess mystic qualities; by it the dragon causes wind to blow, rain to fall, and other miracles. Ignorant people to bring good fortune hang a picture of the dragon in their sleeping rooms. The figure of the dragon is popularly used in paintings and carvings, not only because of the old belief in the fabulous stories, but because the long body with four short legs is convenient to make many curves like arabesques and to fill a narrow space in decoration.

SCROLL PICTURE (Gu-rim.) "Spring in Korea;" in water colors. The favorite plum trees in bloom, willows with expanding leaves, etc., are well painted, and the whole effect is pleasing.

By far the better pictures in the collection are the following outline sketches in India ink, which may be entitled "Scenes from the Social Life of Korea." They are a revelation in Korean art, since they show bold drawing, free treatment, and humorous caricature like that found in the realistic school of Japan.

These pictures illustrate the social customs and industrial arts of the people. They were originally bound together to form a boy's picture book. They are supposed to be nearly three hundred years old.

INDIA-INK DRAWING. Mythological picture; the seven good beings or secondary angels of Korea and China, with the animals and plants appertaining to them. These beings in Japan are called the seven gods of happiness. The central figure bears a striking resemblance to the Japanese Hotei, the president of the seven. The

INDIA-INK DRAWING—Continued.

scene is interesting in tracing the Chinese influence to Japan through Korea. This set of character pictures were drawn by the artist Han-jin o. 1.

INDIA-INK DRAWING. Mythological picture; the seven wise men or gods of good fortune. The central figure, Laotze, writes verses upon a scroll and produces jewels and living animals from his pen. 2.

INDIA-INK DRAWING. Marriage procession of the groom visiting his intended bride. Men in advance carry lanterns for the occasion, followed by the bearer of a wild duck or model of one, the symbol of domestic felicity. Then comes the bridegroom in court dress, always worn on such occasions by all except coolies. As a rule the young man's former nurse follows. 3.

INDIA-INK DRAWING. Coolies at a well. Around the wide, shallow well women are drawing water with rope and bucket, to fill jars which are carried on the head. 4.

This picture shows the dress of the lower class.

INDIA-INK DRAWING. Instruction in archery; teacher showing lad how to draw the bow. The awkward pose of the beginner is well caught. Others are stringing the bow and straightening the arrow. 5.

INDIA-INK DRAWING. Peddlers returning from work. Shows horses, pack saddles, coolie's dress, and method of smoking. 6.

The pack saddles shown here have a deep seat between two yokes. They are girthed and have a wide breech band. Rungs are set in between the yokes of the saddle, to which packages are tied. One of the coolies is striking a light with flint and steel.

INDIA-INK DRAWING. Begging bonzes on the road side. On a large sheet of paper are a number of strips upon which are written sums of money or grain as paid for certain efficacious prayers. The woman in front is about to throw down a few cash, for which the prayers will be said. The bonzes carry small boat-shaped drums, and sing the sacred songs invoking blessings on the contributors. The lady's attendant carries a smoking outfit on her head and fan in her hand. 7.

These priests are not regular beggars, but perform this office according to the rules of a certain sect.

INDIA-INK DRAWING. Preparing tobacco for smoking. The stems are removed and the leaves piled evenly, then the piles are cut into shreds with a long lever knife. The expectant attitude of the man who is waiting for some tobacco is very comical. 8.

INDIA-INK DRAWING. Peasant's family; woman spinning and man making matting on a weighted loom. The loom frame is two forked sticks driven in the ground and a bar placed across. The warp threads are wound around weights. These are divided alternately to opposite sides of the bar. In working the loom a weft straw is laid in where these threads cross the bar, and one set of

INDIA-INK DRAWING—Continued.

weights thrown over, the other set thrown back, inclosing the rush in the warp. This is a tedious process, but produces good work with little machinery and skill. Korean matting is very good. 9.

INDIA-INK DRAWING. Country people passing on the road. Shows the high saddle and common method of riding by holding on to the saddle and allowing the horse to be led. 10.

Etiquette requires that women veil their faces on meeting men. This represents the wedding procession returning from the bride's house.

INDIA-INK DRAWING. House building. Shows men planing timbers, tiling, etc. 11.

Tiles are imbedded in balls of mud placed upon the roof. The plane has handles at the sides.

INDIA-INK DRAWING. Wrestling match. Spectators; street candy seller. 12.

INDIA-INK DRAWING. Boats propelled by sculling, ferrying passengers across stream. 13.

INDIA-INK DRAWING. Women washing clothes by beating them with clubs on rocks. Women braiding hair; man peeping from behind his fan. 14.

INDIA-INK DRAWING. Coolies eating by the roadside. Bowls and spoons are being used. 15.

INDIA-INK DRAWING. Roadside inn. People of middle class taking food and smoking. 16.

These open roadside inns resemble those of Japan.

INDIA-INK DRAWING. Coolies resting by roadside; smoking and chatting. 17.

INDIA-INK DRAWING. Country peddlers. Man carries large basket of vegetables or salt fish on his head; woman carries child and cradle-shaped basket containing crabs. 18.

The child is carried as in Japan, seated inside the loose upper garment.

INDIA-INK DRAWING. Forging. Smith holds red-hot iron on anvil, with tongs, while two men strike. Boy blows bellows, and man sits on the ground dressing piece of wood with curved drawknife. 19.

INDIA-INK DRAWING. Shoeing a horse. Tools lying on ground. 20.

The animal is thrown and the smith tacks on a circular shoe without calks. Korean horses are rarely castrated; hence are vicious. The officials ride donkeys almost universally.

INDIA-INK DRAWING. Plowing and working the fields. Two oxen are attached to a light, one-handed plow. Two men hoeing with implements resembling potato forks. 21.

In Korea the horse is never employed in the plow.

INDIA-INK DRAWING. Thrashing by beating sheaves across a rough log of wood and sweeping grain from the smooth, hard ground. The man taking his ease near by is the overseer. 22.

INDIA-INK DRAWING. Schoolmaster and class of children. Boys are studying, and one is "backing his book," that is, reciting by turning his back to the teacher and placing his book behind him. 23.

INDIA-INK DRAWING. Farmers' wives weaving. Woman working at a rude loom; an old woman taking care of children, and a woman singeing thread to remove frayed fibers before using it for weaving. 24.

INDIA-INK DRAWING. Hired-boy dancer and band of music. Musicians seated in semicircle. Instruments: Bass drum in frame like Japanese drum, accordeon, flute, fifes, and guitar. 25.

INDIA-INK DRAWING. Catching fish in a weir. Men in boats are dipping out fish into jars; at one end of weir is flock of birds. 26.

INDIA-INK DRAWING. Wood-carriers resting and playing a game with small stones; frames for carrying wood at one side. 27.

The carrying frame shown is rectangular, woven at back with rattan, with arm loops at side and ropes for encircling the burden. The arms are passed through loops and load carried on back. A much more commonly used frame is made of two forked limbs, cut about 3 feet long and mortised together with slats.

INDIA-INK DRAWING. Competitors for the civil-service examination. This style of dress, cap, and shoes are worn during the examination. One youth shows his friends the paper on which the answers will be written. 28.

Blocks and movable type are both used in Korea. This is a common block for printing the alphabet sheet from which children learn the ōn-moun or native Korean character. The characters are arranged in vertical columns, and above each is a rough pictorial representation of something containing the initial consonant sound of the characters in the column. The writing on the left is astrological.

Satow says, "There are some Korean books dating back to 1317 and 1324, printed with movable type."*

The name means "game of war." It is curious that the rank depends on the size of the pieces, as in case of Japanese chin. Whether more ancient in type than the pieces at present used in China, which are of uniform size, is conjectural. Played on a board made of wood or paper.

The arrangement of the spots on these is identical with the dominoes of China and it is probable that the games are the same. In this game five or six can play. Kept in the office of the messengers in the palace, official mansions, and governmental departments. Newcomers are initiated by the "society," who pass the noose around the ankle of the candidate and draw up his foot across the knee. Then a set of difficult questions are asked, and for every wrong answer the victim receives a blow upon the sole. This initiation is with a view of getting a treat. Newly married men are also put through a similar ordeal by their friends.

MUSIC AND MUSICAL INSTRUMENTS.

Music is an important institution in Korea. The government educates and maintains musicians and allows bands to furnish music for official receptions and at the palace.

There is a system of notation; the notes are circles and their tonal value is indicated by the shaded area.

Vocal classes are taught the range through which the voice should rise and fall by the inclination of a rod in the hands of the teacher. This is similar in effect to the Tibetan descriptive score.*

There are many musical instruments of all classes. The double-headed drum produces four distinct sounds, according to the place

Of the form known in Japan as *suzu*. It is used by Buddhist priests in some services in the temple, where it is applied for ordinary religious performances, while the larger bronze bell is reserved for a higher ceremony. In the temple this bell is sounded at the beginning and end of the meal. Priests while traveling carry a bell like this specimen.

“When a man feels a longing to be better and to get rid of his sins, he goes to a Buddhist priest and buys a straw figure like this. The priest tells him that he will be absolved if he dresses the image in clothes like his own, puts plenty of cash in the straw man’s belly, and tosses it into the road. The poor people tear the image to pieces to get the cash and the man’s guilt flies away.” (Pin.) This idea is evidently translated into the language of another religion than that of the Koreans.

“Along the road were numbers of straw effigies, such as are made at New Year’s season and sold for a few cents cash. Somewhat human in shape, about a foot and a half in length, each is supposed to be the likeness of some one. Inside is a little cash, and accompanying it is a written statement, saying whom it represents, with a prayer for the coming year. The object is to rid one’s self of this as the Jews did the scapegoat. Sometimes they are burned, but oftener are kept till the evening of the 14th day of the first month, when wandering beggars come by, calling, ‘Give us tehomng.’ The mamikiu is passed through the partially opened gate, it and the misfortunes of the year becoming the property of the old beggar, who sells his peace of soul for the few cash inside the tehomng.” (Rev. J. S. Gale in the Korean Repository, Seoul. Vol. 1, No. 1, Jan., 1892.)

Astrology is an important science in Korea. It is quite possible that the true explanation of the tehomng is astrological. The following table seems to indicate this:

Jik Sung, official or ruling stars.

No.	English.	Korean.	Chinese.	Translation.
1	Na*	Tehomng.	(Na)	
2	Saturn	Hurk	To	Earth.
3	Mercury	Mool	Su	Water.
4	Venus	Soë	Gum	Metal.
5	Sun	Nal	Il	Sun.
6	Mars	Bool	Hwa	Fire.
7	Ke*	Kedo	(Ke)	
8	Moon	Dal	Wol	Moon.
9	Jupiter	Pul	Mok	Plants.

* Mr. Soh does not know to which planets or heavenly bodies these Korean names refer.

When a Korean child attains a certain age he comes under the influence of the planets and in the order of the above table he falls under the sway of good or bad stars. The first period (tehomng) is accounted bad and hence recourse is had to the expiation of the straw image, tehomng. (Soh.)

BOOKS AND LITERATURE.

Korean thought has always been directed through the channels of Chinese learning. There apparently never was a characteristic literature of Korea; the whole plan of education is Chinese, and the language of the country, with its beautiful alphabet, is correspondingly neglected. Korean scholars are as proficient in the Chinese classic style as those of China itself. Books printed in the common character are few and little read.

The education of the child begins with the alphabet. He must commit to memory the "Thousand Character Classic," a Chinese rhymed vocabulary of so many words, no two alike. For the pupil it is arranged thus: the Chinese character, its meaning in Korean and its Chinese name in Korean. After reading this three times the student begins to write. The remainder of the course is in ordinary Chinese schoolbooks. (See Ross's *Corea*, p. 306.)

SCHOOLBOOK. Title, "Elegant phrases accorded to classes, copied complete." Consists of the "Thousand Character Classic" or "door," the "Hundred Family Names," "Correct and Colloquial Variations of Chinese Pronunciation and Chinese Conversations in Chinese, Transliterated with the Korean Letters." Second preface was written by a Buddhist monk of the monastery of Fuh Lin Shan, date July, 1652. Book is without title-page or colophon. Printed in Korea, on native paper.

The book begins with the "ön-moum," or Korean alphabet, said to have been invented about the eighth or ninth century of our era by a bonze named Syöl-chongi. The sounds of this are defined by Chinese characters, for which the student is directed to substitute the sound of the corresponding word in the Korean colloquial language. The bulk of the book is taken up with prayers, (dharani) addressed to Avalokitshwara, and begin with öm or öm-mani padmé-

hūm. The "secret" or "mysterious" characters are a modification of the Sanskrit alphabet ascribed to Brahma, and seem to be identical with those used in the Sanskrit books, said to have been brought to Japan by Kobo Daishi early in the ninth century.—(Dr. D. B. McCartie.)

The five rules are: 1. Honor to parents; 2. Love to brothers; 3. Love to neighbors and friends; 4. Love of country; 5. Love of wife and children. Korean children over ten years old read this book and learn morals and religion from it. It is the custom of the King on the 1st of January to order the head of the bureau of education (Mr. Kim, in this instance) to print a large number of copies of this work and to distribute them to the boys of the district schools. This book is interesting for the glimpse it gives of the Korean educational system.

Shows Nam-san, or South Mountain, where signal fires are lighted nightly, also the Ponk-an, or North Fortress, and the walls and gates of the city. The two principal streets are also shown, and the streams indicated as running through the city are in reality wide ditches, in which refuse is thrown, and which are only thoroughly cleaned out at the time of the heavy summer rains. These ditches are spanned by heavy stone bridges. The extensive grounds of the King's palace are also shown.
