

The birds before me are all in poor plumage, being evidently moulting, but the bright yellow coloration alone is sufficient to separate it from *I. leucopteryx* of Jamaica, which is its nearest ally.

This species is named in compliment to Prof. Spencer F. Baird, of Washington, D. C.

A LIST OF THE BIRDS COLLECTED IN THE
ISLAND OF GRAND CAYMAN, WEST IN-
DIES, BY W. B. RICHARDSON, DUR-
ING THE SUMMER OF 1886.

BY CHARLES B. CORY.

DURING the past summer Mr. W. B. Richardson has been collecting specimens of natural history in the small islands known as Grand and Little Cayman, which are situated south of Cuba, and some hundred and thirty miles northwest of Jamaica.

The collection of birds which was forwarded to me proved to be very rich in novelties, containing no less than thirteen species which I believe to be new and several others which vary slightly from known West Indian forms.
