OFFICE OF ENDANGERED SPECIES
U.S. FISH AND WILDLIFE SERVICE
WASHINGTON, D.C. 20240

SMITHSONIAN
HERPETOLOGICAL INFORMATION SERVICE
NO. 49
1981
This bibliography is a supplement to "A Bibliography of Endangered and Threatened Amphibians and Reptiles in the United States and its Territories" issued as Smithsonian Herpetological Information Service No. 46. Additional references to those species listed in the introduction to this publication are included, as well as references to two species, the Monito gecko (Sphaerodactylus micropithecus) and Wyoming toad (Bufo hemiophyrs baxteri), which have been incorporated into current Program Advises of the U.S. Fish and Wildlife Service for listing or proposal to the U.S. List of Endangered and Threatened Wildlife in fiscal year 1981. It should be also noted that references to two species occurring within U.S. territories, Epicrates monensis granti and Crocodylus porosus, were included in S.H.I.S. No. 46 and are included in this supplement, even though both names were omitted from the list of species covered in the original bibliography. Although no future bibliographies of this nature are planned, updated lists of references dealing with federally protected or proposed species of amphibians and reptiles may be obtained from the U.S. Fish and Wildlife Service. Finally it should be noted that copies of all unpublished reports cited both in S.H.I.S. No. 46 and this supplement have been deposited in the library of the Division of Reptiles and Amphibians at the Smithsonian Institution.
