March 15, 1991

SMITHSONIAN TROPICAL RESEARCH INSTITUTE - Apartado 2072, Balboa, Panama

No. 11

SEMINARS

Tupper Center Auditorium

No noon seminar scheduled for Tuesday, March 19.

Next Week

Tuesday, March 26, noon seminar speaker will be Dr. Kim Derrickson, SI National Zoological Park.

The singing behavior of northern mockingbirds: do females prefer versatile singing?

PEOPLE

Arrivals

■ Cris George Hochwender, Melissa Hughes, Mathew Olson, Mary E. Poulson & Paul E. Brunkov, March 18 - 20, OTS Group to visit BCI facilities.

■ Robert Ricklefs, Smithsonian Regents Fellow, University of Pennsylvania, Mar 15 - May 15, to use Library for reference research, consult with staff and present seminar.

■ Mary H. Ruckelhaus, Margaret A. Wohlenber, Gordon Caster Ward & John Betters Pascarella, OTS Group, March 19 - 21, to visit BCI and other STRI facilities.

Departures

■ Mar 17 - 25, Ira Rubinoff, STRI Director, on official business to Washington, D.C. to consult with SI officials and attend the House Hearings.

DEADLINES

Proposals should be in STRI Director's Office by
March 27 - Scholarly Studies Program;

April 10 - Atherton Seidell Endowment Fund.

See next page for more information.

Madeleine Jacobs (center), director of the SI Office of Public Affairs (OPA), and William Schulz, OPA public affairs specialist, gave a workshop on Talking to Reporters at the Tupper Center on Friday, Mar 8. Since last year, OPA has organized and given four media workshops for the Smithsonian community to train staff who receive inquiries or requests for interviews from reporters. Jacobs and Schulz also gave a mini-workshop on this subject for BCI residents on Mar 9
••• *Madeleine Jacobs (centro), directora de la Oficina de Relaciones Públicas (OPA), y William Schulz, especialista en relaciones públicas de la misma oficina, dictaron un taller sobre Como Conversar con Reporteros en el Centro Tupper el viernes, 8 de marzo. OPA ha organizado cuatro talleres desde el año pasado para entrenar al personal del Smithsonian que suministra información al público o es entrevistado por reporteros. Jacobs y Schulz además dictaron un mini-taller sobre el tema para los residentes de Barro Colorado el 9 de marzo.*

THINGS YOU SHOULD KNOW

Smithsonian Institution's Position Regarding Hunting and Collecting of Protected Species

The Smithsonian Institution is a leader in the field of conservation biology. Smithsonian scientists have played a key role in establishing lists of endangered species, and are engaged in world-wide research to promote the survival of the world's fauna and flora.

Smithsonian employees conducting field research as part of their official duties may obtain specimens of scientific value to add to the national collections, which are used by scientists at the Smithsonian and around the world. However, Smithsonian employees on official research trips for the Institution do not engage in sport hunting.

**Smithsonian Institution's Position (cont.) •••
Política del Smithsonian Relacionada con la
Cacería y Colecta de Especies Protegidas**

When Smithsonian scientists conduct ecological or conservation research on endangered or protected species they obtain permits from all appropriate authorities. Under these circumstances, applications for permits are required to be published in the Federal Register, along with scientific justifications, in order for the deciding authorities to have the benefit of public comment before determining whether to grant the permit applications. Additionally, requirements imposed by the countries of origin must be next.

Private individuals who collect specimens may ultimately offer to donate them to the Smithsonian for its collections and research. These are accepted by the Smithsonian only if they are needed and have legally obtained, exported and imported. It is the policy of the Smithsonian that under no circumstances does it commission trophy hunters to collect specimens; nor does the institution ever lend its name to justify personal permit applications by such hunters.

La Institución Smithsonian es líder en el campo de la ciencia de la conservación. Los científicos del Smithsonian han jugado un papel clave en el establecimiento de los listados de las especies en peligro, y llevan a cabo investigaciones a nivel mundial para fomentar la sobrevivencia de la fauna y flora del planeta.

Los funcionarios del Smithsonian que trabajan en investigación de campo como parte de sus labores oficiales pueden obtener especímenes de valor científico para añadir a las colecciones nacionales estadounidenses, las cuales son utilizadas por científicos de la Institución y de otras partes del mundo. Sin embargo, los funcionarios del Smithsonian que se encuentran en viajes oficiales de investigación para la Institución no deben participar en la caza deportiva.

Cuando los científicos del Smithsonian llevan a cabo investigaciones ecológicas o sobre conservación de especies protegidas o en peligro de extinción obtienen los permisos de todas las autoridades correspondientes para tal efecto. Bajo estas circunstancias, se requiere que las solicitudes para los permisos se publiquen en el Registro Federal de los E.E.U.U., junto con las justificaciones científicas, con el propósito de que las autoridades competentes obtengan el beneficio de los comentarios públicos sobre el tema antes de determinar si conceden los permisos. Además, deben llenarse todos los requisitos exigidos por cada país de origen.

Las personas particulares que colectan especímenes pueden en última instancia ofrecerse a donarlas al Smithsonian para sus colecciones o investigaciones. Esto es aceptado por el Smithsonian sólo si se necesitan y han sido legalmente obtenidos, exportados e importados. Es política del Smithsonian que bajo ninguna circunstancia se encomiende la colecta de especímenes a cazadores de oficio, ni que la Institución brinde su buen nombre a ninguno de estos individuos para justificar solicitudes de caza personales.

(Para mayor información llamar a María Morello, Oficina de Visitantes, Centro Tupper.)

Attention! Proposal Deadlines

□ April 1st is the deadline for submission of proposals for the Scholarly Studies Program July review; funding to begin after October 1, 1991. Proposals should be in the STRI Director's Office by March 27.

□ April 15 is the deadline for submission of proposals to the Atherton Seidell Endowment Fund. Seidell funds projects intended to make information available to a wider audience. Proposals should be in the STRI Director's Office by April 10.

Training Opportunities

During Women's Week (March 18-22, 1991), the Panama Canal Commission has scheduled some training and development activities for their employees, and they are extending participation in some of them to other agencies in the area. The sessions will be held at the PCC Training Center in Balboa. Information regarding the different sessions has been posted at each STRI facility bulletin board. Those interested in attending any of these sessions should make previous arrangements with their supervisors. STRI has been advised that it is not necessary to register in advance.

U.S. Income Tax Assistance

A representative from the Internal Revenue Service (IRS) is visiting Panama for individual consultation on a "first come - first serve" basis.

March 15, 19 and 20th.

8:00 a.m. - 12:30

2:00 - 4:00 p.m.

Tel: 27-1777, Mrs. Saenz.

W-2s

STRI employees (U.S. citizens) who have not received their W-2 form for 1990 are advised to write a memo addressed to Ann Sloper, SI Payroll Office, stating that the form has not been received; please include your Social Security number. The Personnel Office will fax it to Payroll.

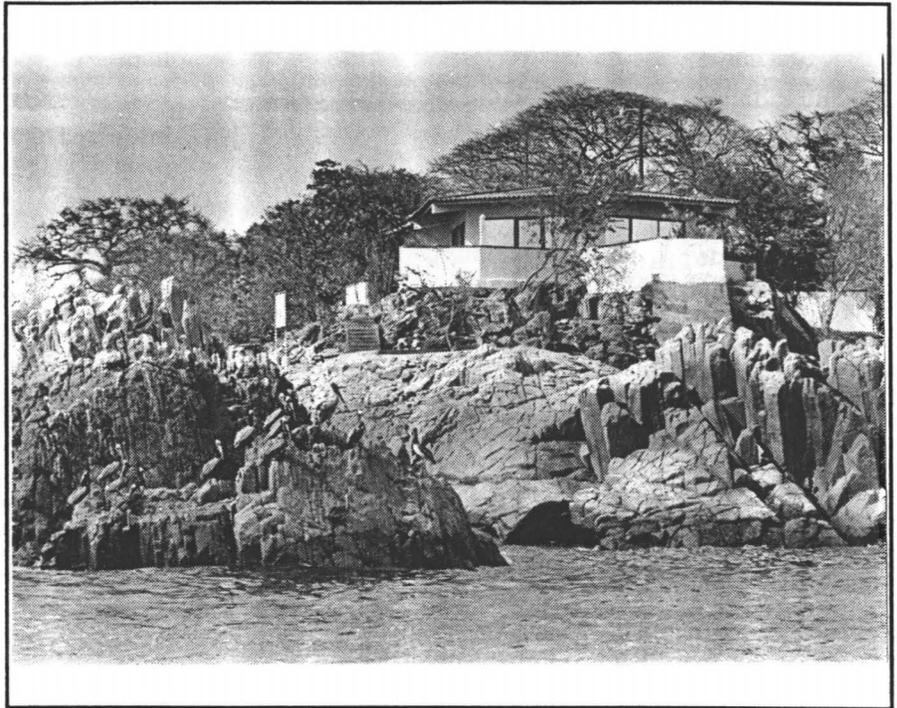

Nuevas Adquisiciones de la Videoteca de Conseroación

La Oficina de Educación y Conservación anuncia que tiene los siguientes nuevos videos para el uso del personal de STRI, y organizaciones o personas que se dedican a la educación ambiental.

Huracán: La Tragedia Oculta, documental sobre el Huracán Hugo.

The Tropical Forest Canopy: the last frontier, video sobre la grúa en el Parque Natural Metropolitano.

Cadena en Acción - Centroamérica, cortos sobre diversos temas de conservación ambiental.

Culebra Island is located about 3.5 kilometers from the entrance to the Amador Causeway, adjacent to Naos Island. By treaty with the government of Panama, since 1978 STRI has had the responsibility to develop Culebra for marine research and education. Between 1983-84, Manuel Noriega had an hexagonal building constructed atop a rocky headland on the island, perhaps because of the beauty of the site, effectively cutting off accessibility to STRI researchers. In 1990, however, STRI renewed its research activities on Culebra ••• Isla Culebra está situada a 3.5 kilometros de la entrada de la calzada de Amador, inmediatamente después de Naos. Según el Tratado Torrijos-Carter, STRI tiene desde 1978 la responsabilidad de manejar Culebra con fines de investigación y educativos. Entre 1983-84, Manuel Noriega hizo construir un edificio hexagonal sobre un promotorio rocoso de la isla, quizás dado la belleza del sitio, al mismo tiempo limitando el acceso a los investigadores. Sin embargo, comenzando en 1990, STRI ha renovado su trabajo de investigación en la isla.
