## Tupper Center Seminars

Wed., Feb. 9, 12:00 noon seminar speaker will be Professor Kurt Hostettmann, Institute of Pharmacognosy and Phytochemistry, School of Pharmacy - B.E.P., University of Lausanne, Switzerland.

*Importance of Medicinal Plants and Drugs at the End of the 20th Century.*

**Abstract:** The process of seeking out plants for medicinally important compounds has expanded greatly in the last 30 years. I discuss the search for anti-HIV and anti-cancer compounds, and in particular the antifungal constituents of certain plants of Panama.

Mario Kreutzberger, "Don Francisco", interviews Oris Acevedo, BCI Scientific Coordinator during his visit to the island, on Friday, Jan. 28. This visit will be part of several segments on Panama to be aired in Sábado Gigante Internacional (with over 20 million viewers) later this year. *Mario Kreutzberger, "Don Francisco" entrevista a Oris Acevedo durante su visita a BCI el viernes 28 de enero. Esta visita forma parte de varios segmentos sobre Panamá que saldrán al aire en Sábado Gigante Internacional (con más de 20 millones de espectadores) próximamente.*

## Things You Should Know

### At the Tupper Center

**Wed, Feb. 9** - Noon seminar Prof. Kurt Hostettmann, Auditorium.

**Thu, Feb. 10** - Emergency Response Subcommittee meeting - SMR at 8 a.m.

**Thu, Feb. 10** - CPR Course in LMR at 8 a.m.

**Thu, Feb. 10** - OEC Slide show - Auditorium at 3 p.m.

### At the Culebra Marine Reserve

**Tue, Feb. 8** - Balboa Elem School.

**Wed, Feb. 9** - Esc. Naciones Unidas

**Thu, Feb. 10** - Esc San José.

**Fri, Feb. 11** - ECO Aventuras.

Published weekly by the STRI  
Office of Education

## People

### Arrivals

- Phyllis Boyd, Field Museum Chicago, Feb. 7-30 June, to study crown status of canopy trees; testing of variable transect methods; examine 1994 fruit crop of *Tachigali versicolor*.
- Simon Haberle, SI postdoctoral fellow from the Australian National University, with his wife Cathy Ranieri, Feb. 9, 1994-14 February, 1995, to study palynology of recent river, delta and continental shelf sediments from the Amazon Basin.
- Camille Mojica, graduate student fellow from the University of California at Berkeley, Feb. 1-26 April, to study ecology, behavior of natural history of the livebearing fish genus *Brachyrhaphis* at Gamboa.

- Elizabeth Pennisi, Science News writer, Feb. 4-15, to meet STRI staff for possible news articles.

### Departures

- Nancy Knowlton, Feb. 3-5 to San Jose, Costa Rica to teach a course and present a seminar at Universidad Nacional de Costa Rica.
- Ricardo Cortez, Feb. 9-13, to Miami, Florida, to attend the Third Annual International Boatbuilders Exhibition and Conference.
- Monica Alvarado, Jan. 30-12 Feb. to Washington, D.C., to attend courses and other official business.
- Alejandro Arze and Luis Lopez, Feb. 12-20, to attend National Security Conference in Washington, D.C.

## Announcements

### Welcome to Dr. Penny Barnes

STRI is delighted to welcome Dr. Penny Barnes as a new Affiliated Research Scientist. Penny Barnes has a PhD. from the University of Plymouth, England and her undergraduate and masters degrees are in Marine Science from the University of Victoria, Canada. She is funded for her current research through a grant from the Office of Naval Research held in conjunction with Professor Colleen Cavanaugh through Harvard University. Penny will be based at NAOS and will conduct research on Invertebrate-Bacteria Symbioses, in particular host-endosymbiont specificity in the mollusc family Lucinidae. Intracellular bacterial symbioses oc-

cur in all bivalves belonging to the family Lucinidae and were undoubtedly a critical factor in their evolution. Very little is known, however, about the specificity of the relationship between the symbionts and their lucinid bivalve hosts. In addition, species boundaries within the lucinids are currently based entirely on shell morphology and are ambiguous. The specificity of the relationship between the lucinid bivalves and their bacterial endosymbionts may be of systematic importance or may demonstrate ecological specificity. Investigations into the symbio-host relationship in the lucinid bivalves may have implications for other bacteria-bivalve symbio-

### Solicitud de Voluntario

Se necesitan asistentes voluntarios para trabajar en BCI desde marzo hasta mediados de abril, marcando, mapeando y midiendo árboles en 16 parcelas experimentales. Se están construyendo grandes cercas alrededor de 8 parcelas para impedir la entrada de los mamíferos. El objetivo del experimento es determinar la función de los herbívoros en la regeneración del bosque. El título del proyecto es: "¿Controlan los mamíferos y los insectos la diversidad del bosque tropical?; un experimento a nivel comunitario". Los voluntarios deben viajar todos los días a BCI o quedarse en Gigante. Interesados favor comunicarse con el Dr. Walter P. Carson en Barro Colorado o con la Oficina de Educación.

### Announcement from the Office of the Director

The use of STRI vehicles is not authorized for participation in Carnival events in the Republic of Panama during February. There are a number of car-rental agencies which can readily provide vehicles for anyone interested in participating in these events.

### Anuncio de la Oficina del Director

No se pueden usar los vehículos de STRI para participar en los eventos de Carnaval en la República de Panamá durante Febrero. Hay varias agencias de alquiler de autos que alquilan carros a cualquiera interesado en participar de estos eventos.

### Fellowship awarded to Francisco Rivera

Francisco Rivera, STRI computer specialist, was recently awarded a full scholarship from the Learning Tree Professional Certification Program, as part of their Excellence in Education Competition. Rivera was selected from among many applicants in companies such as Hewlett-Packard, Novell, Intel and Lotus. The scholarship supports Rivera in 5 four-day courses that will enable him to become a Certified Internetworking Professional, and will facilitate the implementation of the STRI telecommunication master plan.

### Harbor Branch Internships and Workshops

Harbor Branch is offering student internships and faculty workshops as well as undergraduate courses in introductory marine biology and oceanography and specialized courses in aquaculture, invertebrate and fish biology and environmental science. For information, see flyer posted at Tupper Building bulletin board.

### Reminder

The "Jacana" will be undergoing maintenance from February 8 to 11. The "Las Cruces" will be in use during this period.

### Access to the Causeway

Access to the Amador Causeway "at no cost" and "in vehicle" is only and exclusively for STRI Official business related. Our access to the area is regulated by the Municipal Security. STRI's official mission at Naos could be affected if we do not comply with these regulations. When coming to Naos for recreational purposes, leave your car at the parking space located at the entrance, walk and pay the 25¢ fee. Thanks for your cooperation.

Acceso a la Calzada de Amador "sin costo" y "en vehículos" es única y exclusivamente por asuntos oficiales relacionados con STRI. Nuestro acceso al área está regido por la Vigilancia Municipal. Por lo tanto, la misión oficial de este Instituto en Naos podría afectarse si no cumplimos con los reglamentos establecidos. Cuando visite Naos por recreación, deje su vehículo estacionado a la entrada de la calzada, camine y pague los 25¢ de entrada. Gracias.

## Director of National

### Police Visits STRI

Lic. Oswaldo Fernández, Director of the National Police, visited STRI Administrative Headquarters last Tuesday, January 25 and met with Ira Rubinoff and other STRI representatives.

He was accompanied by Major José A. Gomez, Director of the Panama Canal Area Police, and Captain Ida de García, Chief of the Forest Police.

During this visit they toured the Earl S. Tupper Exhibit Hall, the Library, laboratories and other facilities. On this occasion, the National Police and STRI signed an important collaborative agreement, which formalizes the joint protection and patrols of the Barro Colorado Nature Monument. During recent years, these joint patrols have been conducted effectively by members of the National Police and the STRI gamewarden.

The continuing support from the director of the National Police and his awareness of the importance of protecting the Barro Colorado Nature Monument are sources of encouragement for the members of the Forest Police and the STRI gamewarden, who patrol day and night to ensure the protection of this important area.

STRI Director Ira Rubinoff and Oswaldo Fernandez, Director of the Policía Nacional, sign an important agreement for the joint protection of the Barro Colorado Natural Monument. *El Director del STRI Dr. Ira Rubinoff y Oswaldo Fernandez, Director de la Policía Nacional, firman un importante acuerdo de protección conjunta del Monumento Natural Barro Colorado*

## El Director de la Policía Nacional visita STRI

El Director del Instituto Smithsonian de Investigaciones Tropicales, Dr. Ira Rubinoff, recibió la visita del Lic. Oswaldo Fernández, Director de la Policía Nacional, el pasado martes 25 de enero en la sede administrativa del Instituto en el Corregimiento de Ancón.

El Director Fernández estuvo acompañado del Mayor José A. Gómez, Director de la Policía del Área Canalera y de la Capitana Ida de García, Jefa de la Policía Forestal.

Durante la visita, recorrieron el Centro de Exhibiciones Tupper, la Biblioteca, los Laboratorios y otras instalaciones del Instituto. Además, se llevó a cabo la firma de un importante Acuerdo de Cooperación entre la Policía Nacional y el Smithsonian. Este Acuerdo formaliza las actividades conjuntas de protección y patrullaje del mundialmente reconocido Monumento Natural de Barro Colorado, las cuales se han estado llevando a cabo de manera armoniosa y efectiva por unidades de la Policía Nacional y

miembros del cuerpo de guardabosques del Smithsonian, durante los últimos años.

La comprensión y sensibilidad del Director de la Policía Nacional con relación a la importancia de la continua y efectiva protección de la integridad del Monumento Natural de Barro Colorado, es un estímulo para las unidades de la Policía y del cuerpo de Guardabosques del Smithsonian, quienes laboran día y noche en cumplimiento de su misión. Mediante la firma de este Acuerdo se reconoce la importancia de las actividades de protección, a fin de garantizar la disponibilidad de esta área protegida, y así continuar estudiando los procesos naturales del bosque y de los organismos tropicales.

### Announcement:

The scientific Staff meeting scheduled for Tuesday, Feb. 8 has been cancelled.
