- Tue, Jun 6, noon seminar speaker will be Thomas Hartmann, visiting scholar from the Institut für Pharmaceutische Biologie der Technischen Universität, Germany.
Chemical Interactions Between Plants and Insects: The Example Pyrrolizidine Alkaloides

Abstract

While still controversial, the importance of plant secondary metabolism in chemical interactions between plants and their environment is receiving increasing attention. We chose the pyrrolizidine alkaloids (PAs). The biochemistry and physiology of PA-formation and their metabolism, long-distance translocation and subcellular accumulation, will be discussed.

SPECIAL SEMINARS

Chemical Ecology of the Pyrrolizidine Alkaloids: A Mechanistic View

Abstract

In respect to their attractiveness for specialized insects, pyrrolizidine alkaloids (PAs) are unique among alkaloids. The mechanisms of ingestion, uptake, storage and metabolism of PAs by specialized insects will be discussed.
