

Figure. 1 Lois Alexander Lane with pieces from her collection.

Fig.4 Left is the red coat with insect damaged hem, right resulting frass found below coat.

Fig. 2 a-c from left: a: Furniture carpet beetle (*Anthrenus falvipes*, Le Conte); b: Varied carpet beetle (*Anthrenus verbasci*, Linneaus); c: Common or Buffalo carpet beetle (*Anthrenus scrophulaia*, Linneaus). Figure 2c has its wings beginning to open; the others have their wings tucked under.

Fig. 3 a-c Carpet beetle larvae from left: a: Furniture carpet beetle (*Anthrenus falvipes*, Le Conte); b: Varied carpet beetle (*Anthrenus verbasci*, Linneaus); c: Common or Buffalo carpet beetle (*Anthrenus scrophulaia*, Linneaus). The size of the larvae will vary with the instar or stage, about 2.5-6.5 mm (up to about ¼ inch long).
